
Hardman Johnston

Large Cap Equity

2026 Second Quarter Report

General Information¹

Firm Assets \$10,230.6 million

Strategy Assets \$125.8 million

Benchmark S&P 500 TR

Active Share (%) 79.4

Composite Inception Date Dec-1989

(1) Large Cap Equity strategy assets include all derivations of the large cap accounts managed by the firm. In the event the portfolio holds multiple share classes of a company, the total number of positions reflects the multiple share classes as a single position. Active share is calculated in FactSet and reflects a 10-year period ending June 30, 2026.

Performance

Performance is through June 30, 2026. Periods greater than one year are annualized. **Past performance does not guarantee future results.** Net performance reflects the deduction of advisory fees and reinvestment of income (if applicable). Composite inception date: December 31, 1989.

Key Takeaways

- The US economy is showing promising signs for acceleration from top to bottom.
- Geopolitics, inflation worries, and AI regulation pose risks to economic growth in the near to medium term.
- The market appears to be broadening, with performance being delivered from a growing list of industries.

Market Review & Outlook

The June unemployment rate came in at 4.2%, slightly lower than expected. That is indicative of a healthy US labor market and a healthy US economy. Indeed, consumer confidence has improved slightly after weathering a period of angst earlier in the year. Business confidence is also improving, boding well for continued investment. In the absence of a shock, we expect the US economy to keep chugging along at a steady pace, with enough growth to provide a solid backdrop for corporate profit growth.

What could go wrong in the short to medium term? Plenty, as we have seen already this year. Military outcomes that could hurt economic growth and trade policy are the obvious sources of risk but not the only ones. An inflation scare could cause the Federal Reserve to reverse course and raise their target interest rates. Society is increasingly nervous about artificial intelligence, but so far has held off on constraining the growth as companies and countries vie for leadership.

What could go right? Continued investment driving a more robust domestic supply chain. AI applications causing a long-sought boost in productivity with an increasingly tight labor market. A long-awaited rebound in the housing market. Consumer spending could continue to improve.

How is this tension manifesting itself in the portfolio? While we select stocks based on their long-term prospects, we do keep an eye on shorter-term performance to make sure we are not missing anything. In our most recent review, we see improving opportunities across agriculture, aerospace, consumer, financial services and select areas of housing and healthcare. What do they all have in common? They are not driven by direct AI investment, although we expect virtually every area of the economy to benefit from implementing AI tools.

Managing position sizes and being diligent about portfolio diversification is hard to do when stocks are running, but it remains our duty to our investors. We are seeing signs that discipline may soon bear fruit.

Portfolio Commentary

Hardman Johnston's Large Cap Equity composite delivered a return of 9.5% in the second quarter and 10.1% for the first six months of 2026, both net of fees. These compared to 15.2% and 10.2% for the S&P 500 Index.

In the quarter, performance was driven by gains in **Illumina, Inc.**, **SharkNinja, Inc.**, and **Vertiv Holdings Co.** With 70% market share in the gene-sequencing business, Illumina remains the preferred provider for researchers and clinicians who increasingly rely on genetic data to develop and prescribe therapies in human health. The company's products have also found uses in many other areas of life sciences.

SharkNinja has overcome concerns about its supply chains and continues to innovate and disrupt with its home products and appliances. It remains the preferred choice of consumers seeking the latest products at the right price.

Vertiv Holdings continues to prove its value to its customers who are building out data centers. While not very glamorous, their suite of cooling and power management infrastructure products are essential to the AI wave.

Detractors include **Albemarle Corp.**, **SLB Ltd.**, and **EOG Resources, Inc.** While Albemarle had a good run-up earlier in the year, it has pulled back recently as prices for battery grade lithium have retreated in the face of a short-term boost to supply. Longer term we continue to expect shortages in these materials.

It should come as no surprise that SLB and EOG Resources have traded down in sympathy with benchmark oil prices. They remain the best in their respective fields, but they are and will always remain sensitive to the price of oil.

The data shown is of a representative portfolio for the Hardman Johnston Large Cap Equity strategy and is for informational purposes only and is not indicative of future portfolio characteristics/returns. Actual results may vary for each client due to specific client guidelines and other factors. The representative portfolio was chosen as most representative of the Large Cap Equity strategy. Portfolio holdings and/or allocations shown above are as of the date indicated and may not be representative of future investments. Future investments may or may not be profitable. In the event the portfolio holds multiple share classes of a company, the total number of positions reflects the multiple share classes as a single position. Hardman Johnston Global Advisors generally uses Global Industry Classification Standard ("GICS") to determine sector classification. Hardman Johnston may reclassify a company into a more suitable sector if it believes that the GICS classification for a specific company does not accurately classify the company from our perspective.
